

Coco Pendant Light

Fact Sheet

Coco Pendant Light

Design by Simon Klenell

Coco by Simon Klenell is a collection of opaline glass lights, made in non-uniform spheres, which provide a sideways take on a well-loved product typology. With the simple idea of a hand-drawn circle at its heart, Coco has been created to translate the poetic and human qualities of that very idea. Developed as a pendant light of three sizes and as a table light, Coco is both a distinctive decorative piece and a resolutely functional design. It emits a warm and balanced light, ideal for a calm environment, or as part of a broader lighting scheme. The pendant versions utilize a discreet aluminum screw-in fitting, while the table version has a full glass body, with an aluminum base insert and a dimmer on the cable. Coco is an everywhere design, distinguished by its smallest details.

| Product name | Finish | SKU |
