

OPUS

Design: Bruno Erpicum

The taps collection, made of AISI 316L stainless steel, is available with progressive, dual handle and thermostatic mixers. Created with the intent of the designer to "clean the superfluous" and tell only the "essential": a cylinder of 60 mm as a handle for temperature control, another of only 18 mm carries water. No additional elements (the collection does not include the use of rosettes), a single material, steel. The main feature of the collection is the composition: the spout mounted/installed in line with the handles are aligned to the lower edge of the remote control, that gives to OPUS a deliberately asymmetric appearance.

A wide choice of remote controls and shower sets allows endless combinations with FREE IDEAS outlets: spouts, shower heads and hand showers allow you to configure and customize the product. All the products of the OPUS collection are available in the standard satin and polished finish and in all CEA's special finishes (Black Diamond, Bronze, Copper and Light Gold) guaranteeing an ecological and biocompatible solution.

These taps are completed with the OPUS accessories collection.
