

Design Mario Ferrarini

Syn, 956/TBC-52
tavolino \ side table

La collezione Syn indaga la relazione tra volumi multiformi che si incontrano e si uniscono in un equilibrio armonico. La famiglia è caratterizzata da una base scultorea in cui un parallelepipedo e un cilindro si intersecano, dando vita a un unico e maestoso volume. I coffee tables e il side table riprendono e rielaborano il concetto di intersezione tra forme e materiali, declinandolo in proporzioni più contenute, ideali per spazi living e lounge.

The Syn collection explore the relationship between multiform volumes that meet and merge in harmonious balance. The family is characterized by a sculptural base in which a parallelepiped and a cylinder intersect, creating a single, majestic volume. The coffee tables and side table revisit and rework the concept of intersection between shapes and materials, adapting it to more contained proportions, ideal for living and lounge spaces.
