

## FILLET | INDOOR - OUTDOOR

design Giacomo Moor

Armchair available for indoor and outdoor use.

**Indoor version:** tubular steel frame Ø25 mm with epoxy polyester powder coating in Gunmetal grey or burnished color.

Shell, fixed to the frame using screws, in 15 mm thick flexible plywood, curved and veneered in natural and charcoal dyed oak finishes, or in Stone Oak® with water-based coating, or in tobacco-dyed oak or multilayer wood veneer Striped Grey, with acrylic coating.

Support cushion in polyurethane foam covered with acrylic fibers, and fabric or leather upholstery with a non-slip cotton fabric backing, fully removable with zippers.

**Outdoor version:** structure in AISI 316 stainless steel tubing, Ø25 mm. Shell, fastened to the structure with screws, in 5 mm thick aluminium sheet. Both elements are finished with matt, scratch-resistant paint, available in black or RAL 9001 White Cream color.

Seat and backrest cushion in open cell polyurethane foam with a draining fabric cover, and upholstery in outdoor fabric only with a non-slip fabric backing, fully removable with zippers.

For both versions floor support provided by black plastic supports. Seat depth: 55 cm.

## Notes

Wood is a living material; therefore, it can have slight color and dimension changes. The presence of any non-homogeneous color shades is not to be considered a defect but a quality. Please note that the direct sunlight exposure may alter the wood color; therefore, we recommend the periodic position shift of the objects placed on the furniture for the first months to avoid differences in shades between exposed and covered portions.

**STRIPED GREY:** it is a decorative multilaminar wood veneer, always finished with a transparent acrylic painting, which features exclusive patterns reproducing the natural characteristics of wood. We would like to remind you that, being a natural and living wooden material, it may present non-homogeneous colour shades, which are peculiarities of the material itself.

**STONE OAK®:** this wood owes its particular coloring to an entirely natural process. Because of this, some slabs may look more brown than others. Our commitment is to provide you a high-quality product; any differences in color should not be considered as defects.

The scratch-resistant coating increases scratch resistance compared to standard coatings, but doesn't completely eliminate the possibility of scratches on the surface.

For the **OUTDOOR** version, especially after prolonged rainy or humidity periods, it is suggested to rotate the elements and/or to temporarily lift the seat/back/armrest cushions to allow a complete drying and to avoid accumulation of dirt and moisture, causing the formation of mold. We recommend placing the product on terraces or verandas to guarantee its durability over the years. It is recommended to use a "Protective Cover" to improve the longevity of the product. For further information about the dedicated maintenance, please refer to the technical sheet available in the "Materials" section on our website.

For information on the compatibility of the collection's coverings with each product, please refer to the [compliance sheet](#) provided in the "Materials" section of the website.

For leather coverings the "Leather A" or "Leather B" Maintenance Kit is included with the product.
