

## GRAFT

design David Lopez Quincoces

Series of square, rectangular, or round tables featuring a sandwich-constructed top made of high-density rigid polyurethane, coupled with carbon fiber sheets pre-impregnated with epoxy resins, and an MDF panel, all pressed and glued together (using two-component adhesives); specific HPL reinforcement embedded to allow the mounting of the legs, made of CNC-machined extruded aluminum, using stainless-steel tie rod.

Top available veneered in Stone Oak®, charcoal-dyed or natural oak with water-based finish, multilaminar wood Striped Grey or tobacco-dyed oak, with acrylic finish; round tabletop version always features segmented inlay. Legs finish with epoxy polyester powder coating in gunmetal grey or burnished colour. Floor support provided by plastic tips.

Striped Grey

### Notes

Wood is a living material; therefore, it can have slight color and dimension changes. The presence of any non-homogeneous color shades is not to be considered a defect but a quality. Please note that the direct sunlight exposure may alter the wood color; therefore, we recommend the periodic position shift of the objects placed on the furniture for the first months to avoid differences in shades between exposed and covered portions.

STRIPED GREY: it is a decorative multilaminar wood veneer, always finished with a transparent acrylic painting, which features exclusive patterns reproducing the natural characteristics of wood. We would like to remind you that, being a natural and living wooden material, it may present non-homogeneous colour shades, which are peculiarities of the material itself.

STONE OAK®: this wood owes its particular coloring to an entirely natural process. Because of this, some slabs may look more brown than others. Our commitment is to provide you a high-quality product; any differences in color should not be considered as defects.

On request, an additional protective (acrylic solvent) painting is available for the Stone Oak® finishing only. It should be noted that this additional coating slightly changes the natural color and texture of the surface. Although this supplementary painting increases the surface resistance, it is still a natural material; therefore, small superficial stains, due to oil or other substances, must be promptly removed, before being absorbed in depth by the wood. Thus, we recommend regular care and maintenance.
