

AERO B

design Shibuleru

Bar unit composed of monoblock container consisting of top and bottom in 18 mm thick MDF fitted with a contoured runner to house a sliding shutter door made of extruded aluminium, to which are screwed aluminium "blade-handles" section 10x8 mm. Central body in contoured MDF milled on the outside, with internal side panels and central support shelf in MDF. Contoured lower shelf, in double-panelled wood, 18 mm thick, consisting of a 7 cm frame in solid beech wood and board honeycomb, enclosed by two aluminium plates, fitted with holes and bushings to allow assembly of the uprights. All MDF components are finished with scratch-resistant matt black paint. Shutter door painted in RAL 9017 matt black color only.

Uprights in steel rod Ø22 mm, with inserted fixing element for the lower shelf. The frontal upright is provided with contoured plates for the fixing of the container compartment; while the other uprights are screwed to the backrest. Two additional steel rod supports, with integrated height adjustable plastic feet, are screwed to the lower shelf. Uprights, additional steel rod supports and feet are finished with epoxy powder coating in RAL 9017 black. Available with internal spotlight equipped with motion sensor and rechargeable lithium battery. Charging with induction system and Micro USB cable. Available with 3000 K light.

Notes

The scratch-resistant coating increases scratch resistance compared to standard coatings, but doesn't completely eliminate the possibility of scratches on the surface.
