

AERO T

design Shibuleru

Serving Cart with shelves and open storage unit, featuring a supporting metal frame in matt black finish, with perimeter uprights in tubular steel Ø22 mm, shaped plates for the shelves attachment, and wheel housing fastened to the uprights with screws. Swivel wheels with a rubber coating. Shelves in shaped MDF with a scratch-resistant matt black paint coating and open container, with HPL frame always upholstered in black leather, secured to the shelf using screws. The shelves are fitted with bushings to allow the assembly to the frame.

Optional additional accessories:

- bottle holder in 3 mm thick perforated and curved aluminum sheet;
- dividers made of 3 mm thick steel sheets welded together;
- MDF organizer tray folding-shaped with outer part in matte black coating and internal part and upper edges in wood, available in the finishes: canaletto walnut, charcoal-dyed oak or Stone Oak®. Also available with outer part, inner part and upper edges in scratch-resistant black coating. Transparent silicone non-slip feet. Optional accessories, bottle holders and dividers with matt black paint, and additional matt transparent anti-slip coating.

The divider 32x32 cm can only be used in combination with the bottle holder.

Notes

Wood is a living material; therefore, it can have slight color and dimension changes. The presence of any non-homogeneous color shades is not to be considered a defect but a quality. Please note that the direct sunlight exposure may alter the wood color; therefore, we recommend the periodic position shift of the objects placed on the furniture for the first months to avoid differences in shades between exposed and covered portions.

STONE OAK®: this wood owes its particular coloring to an entirely natural process. Because of this, some slabs may look more brown than others. Our commitment is to provide you a high-quality product; any differences in color should not be considered as defects.

On request, an additional protective (acrylic solvent) painting is available for the Stone Oak® finishing only. It should be noted that this additional coating slightly changes the natural color and texture of the surface. Although this supplementary painting increases the surface resistance, it is still a natural material; therefore, small superficial stains, due to oil or other substances, must be promptly removed, before being absorbed in depth by the wood. Thus, we recommend regular care and maintenance.

The scratch-resistant coating increases scratch resistance compared to standard coatings, but doesn't completely eliminate the possibility of scratches on the surface.
