

## KASBAH LOW TABLE | OUTDOOR

design David Lopez Quincoces

Coffee tables available in the sizes 70x100 cm and 100x100 cm, consisting of a supporting frame in solid Teak wood section 90x35 mm, equipped with corner and central moulded supports in recycled and regenerated polyamide, fixed to the frame by means of stainless steel screws. Feet in solid Teak wood Ø40 mm, fixed to the corner supports through an embedded bushing; floor support provided by black plastic tips.

**Teak tabletop:** coffee tabletop (thickness 2 cm) with 45° bevelled edges, composed of two sections (only for the size 70x100 cm) or three sections in plywood for outdoor use, veneered with Teak slabs. The sections are fixed to a black milled HPL 8 mm thick panel, inset into the supporting frame.

**Porcelain stoneware tabletop:** tabletop (thickness 12 mm, straight edge), made of a single slab in the colors and finishes of the collection, fixed to the base by means of stainless steel screws.

### Notes

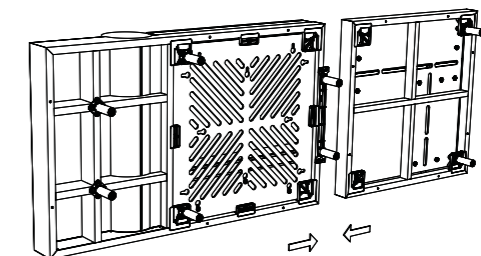

**TEAK:** Teak wood comes from certified plantations, and it is an extremely durable material, resistant to weathering and acids, because of the presence of an oil-resin component that ensures exceptional durability. It features a wide range of colors that vary greatly, from pale yellow to bronze, with a reddish hue. Extended and continuous exposure to weathering agents changes its surface layer, leading to oxidation that gives it a gray-silver tone. A regular maintenance helps to preserve the wood's original color over time; any differences in color should be considered as qualities rather than defects, as they are a characteristic feature of Teak.

Wood is a living material; therefore, it can have slight color and dimension changes. The presence of any non-homogeneous color shades is not to be considered a defect but a quality. Please note that the direct sunlight exposure may alter the wood color; therefore, we recommend the periodic position shift of the objects placed on the furniture for the first months to avoid differences in shades between exposed and covered portions.

We recommend placing the product on terraces or verandas to guarantee its durability over the years. It is recommended to use a "Protective Cover" to improve the longevity of the product. For further information about the dedicated maintenance, please refer to the technical sheet available in the "Materials" section on our website.

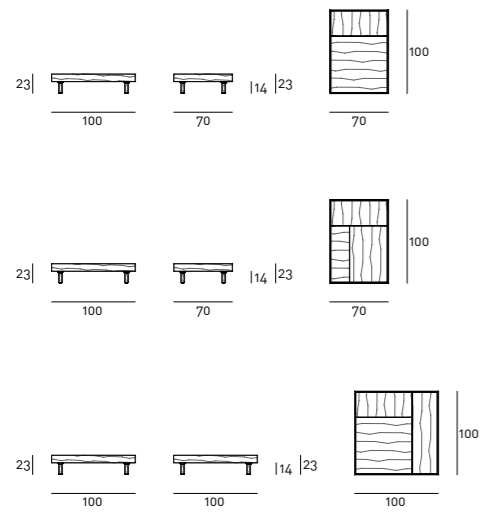

For wooden finishing the "Outdoor Wood" Maintenance Kit is included with the product.

The coffee table is assembled in composition using brackets, as shown in the drawing below.

For compositions with different elements and coffee tables, please attach a general sketch to the order.
