

1000 Karat Blau
AXEL SCHMID 2009/2016

1000 Karat Blau is a large, impressive pendant luminaire with the effect of a light object. The gold leaf in the acrylic shades reflects the warm, long-wave portion of the light back and forth, creating a particularly cozy atmosphere. As with the smaller 24 Karat Blue, which has been part of the Ingo Maurer collection since 2005, only the short-wave blue light can shine through between the molecules of the gold leaf. This makes the point of light appear bluish. Large clusters can be created by connecting several pieces together.

Light source

Socket: E27, max. 60 W Supplied without light source. Suitable for LED filament and halogen lamps of energy classes A-G.

Technical data

For 100 - 240 volts.

More info

Optional reflector included.

Colours

Red poles, white canopy
