

### Wo-Tum-Bu 1

DAGMAR MOMBACH, INGO MAURER & TEAM 1998

Wo-Tum-Bu 1 is meticulously handcrafted. As with all luminaires in the MaMo Nouchies collection, the shade is made of Japanese paper. In the workshop of Dagmar Mombach, it is shaped in a multi-step artisanal process. The concrete bases are cast by hand. Their unique look—with irregular surfaces and occasional air bubble marks—is a deliberate design feature. Every Wo-Tum-Bu is one of a kind.

#### Light source

Socket: E27 max. 150 W, or E26 for US / JP plug version. Light source: Suitable for dimmable bulbs of energy efficiency classes EEC A–G. Bulbs can be replaced by the user.

#### Technical data

100–240 V Continuously dimmable via foot dimmer integrated in the cable.
