

Storage

Arik Levy, 2004

The Storage cabinet range by Arik Levy can be used with all Vitra office furniture systems. The cupboards and sideboards in various widths and heights combine to offer a wide range of configurable storage options, which can be easily assembled, converted and dismantled.

The lack of acoustic damping is a frequent criticism of open-plan offices. With this in mind, Vitra developed highly effective acoustic front panels, which have been proven to reduce the level of ambient noise, thereby supporting concentration while working.

Storage is available as a cabinet and as a sideboard as well as in a complementary locker system.

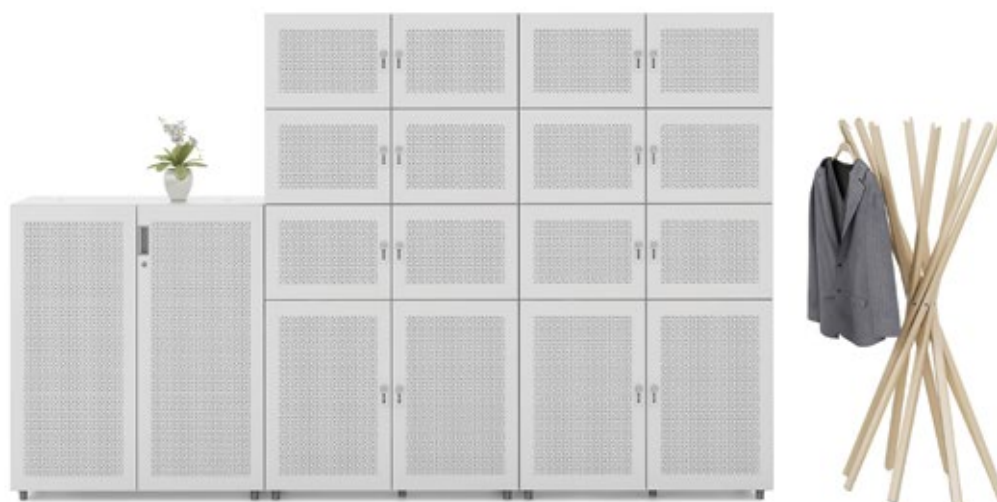

Arik Levy

Arik Levy lives and works in Paris. His studio's activities extend from the creation of sculptures and installations to the development of industrial designs and everyday products. Levy has worked with Vitra since 2000, designing a range of office furnishings and supervising various projects.

4-5	Cupboards, sideboards	11	Linking	17	Dimensions, colours

Storage hinged door cupboards provide space of up to 5 height units for archiving work materials.

Storage Locker offers the employees storage space for personal items and the soundproof front panels reduce noise levels.

Storage cupboards can be used as room dividers. The variable assembly make it particularly space-saving.

Storage Sideboards, combined with cover plates, are the same height as work tables and provide additional work surfaces. Storage cupboards can be horizontally linked.

Storage roller shutter cupboards with soundproof front panels, linked back to back and with 3 HU at standing height for brief meetings.

Storage cupboard in 3 HU with hinge door, drawer with open unit, combined with Silent Wall and used as a Service Corner.

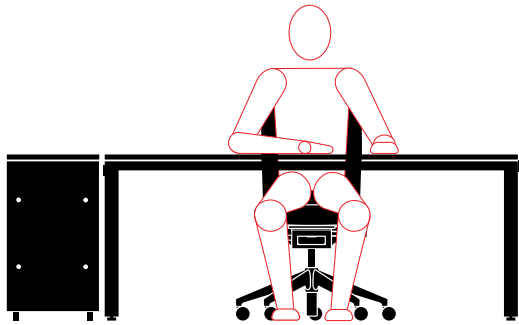

Width

Storage cupboards are available in the widths of 80, 100 and 120.

Front panels

Storage cupboards open and with hinged doors are available in 2-5 HU, drawers and roller shutters exclusively available in 2 and 3 HU.

Height

Storage Sideboards with a height of 1.5 HU in combination with a cover plate can be assembled flush with the table top and provide expanded surface space at the workstation with integrated storage space.

Width

Storage Sideboards are available to match the workstation depths in the widths of 80 and 90 cm.

Front panels

Storage Sideboards are available open, with hinged doors, with two drawers and with roller shutters.

Storage hinged door cupboard – Acoustics

Available in 2-5 HU in the widths of 80, 100 and 120

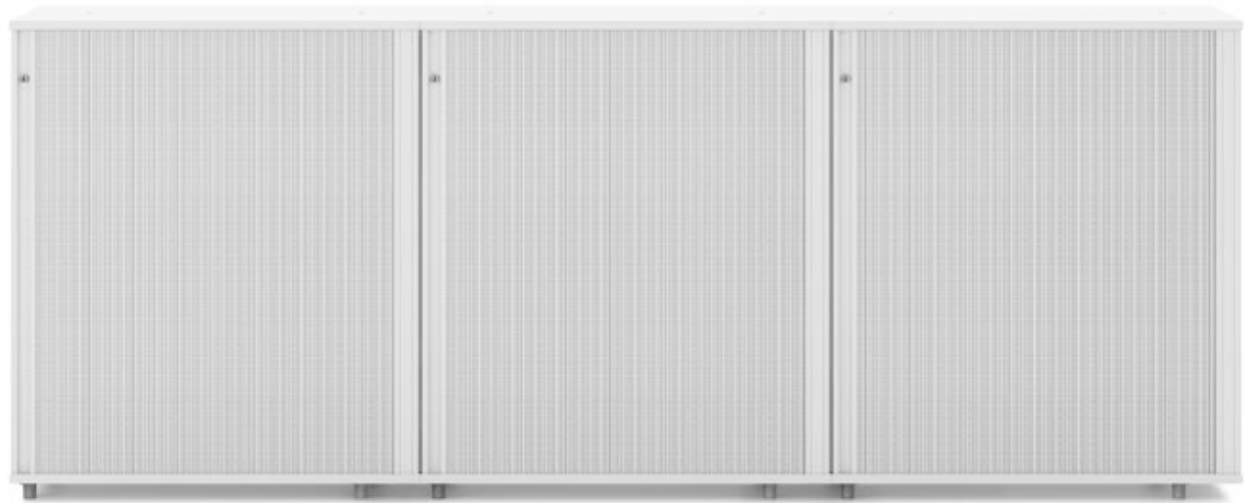

Storage drawer cupboard

Available in 2 and 3 HU in the widths of 80, 100 and 120

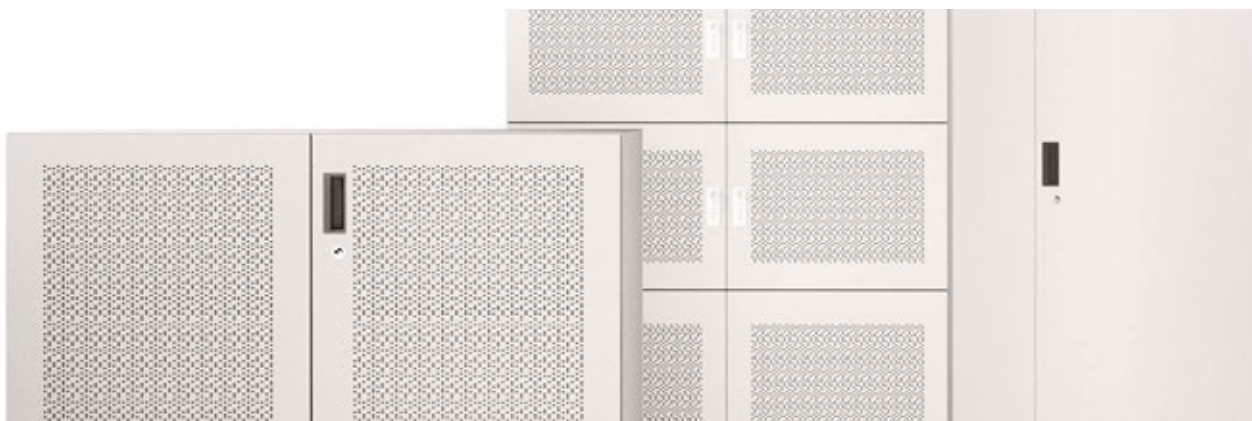

Storage roller shutter cupboard

Available in 2 and 3 HU in the widths of 80, 100 and 120

Storage roller shutter cupboard – Acoustics

Available in 2 and 3 HU in the widths of 80, 100 and 120

Acoustics: Patented perforated pattern with soundproofing, available as a hinged door cupboard and Storage Locker. Roller shutter cupboard also available with the option of soundproof front panels.

Colours: Storage is available in soft light, the soundproof front panels of the hinged door cupboards and Storage Locker are available in eight colours.

Shelves can be individually positioned in a 32-mm grid. On the underside rails are attached to vertically hold A4 suspension files.

Hangrails for hanging files can be retrofitted to vertically hold A4 suspension files in the top filing shelf.

Drawers with full extension drawer can hold up to 3 HU. One or two drawers can be used and individually divided for each HU.

Suspension file frame with full extension drawer for frontal or lateral use of suspension files; can be hold up to 3 HU.

Dividers vertically divide drawers and can be flexibly positioned with clips.

Separators horizontally divide drawers and are clipped to pre-defined mounting points between two partitions.

Use of two dividers and three separators

Use of three dividers and one separator

Toolbox is a practical organising tool for work materials and accessories because it ensure you have everything to hand. Combined with Storage Locker, Toolbox is also a useful aid for non-territorial work.

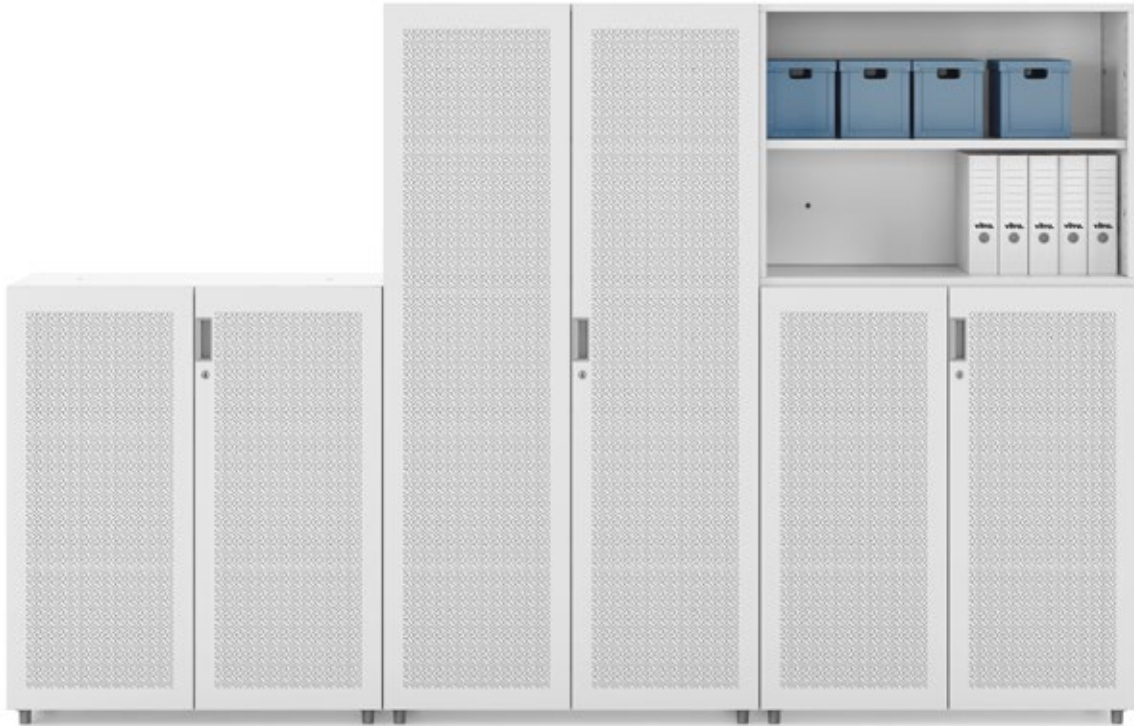

Bookend is for organising work documents on a shelf, as well as in cupboards. A magnet on the underside holds it in position.

Storage open is a component that is open on both sides in 1 HU and available for Storage cupboards and sideboards in the widths of 80, 90, 100 and 120 cm.

Cover plates protect the surface of the body and, with a length of 80 - 240 cm, both cupboards and sideboards of equal height can be linked to create a continuous surface.

Linking: horizontal and vertical

Storage is linked via pre-defined connection points without damaging the surface. This means that cupboard elements can be retrofitted and, if required, reduced. The horizontal linking prevents sliding, as

well as any possible gaps between the cupboard elements. With the vertical linking Storage can be stacked up to a maximum height of 5 HU.

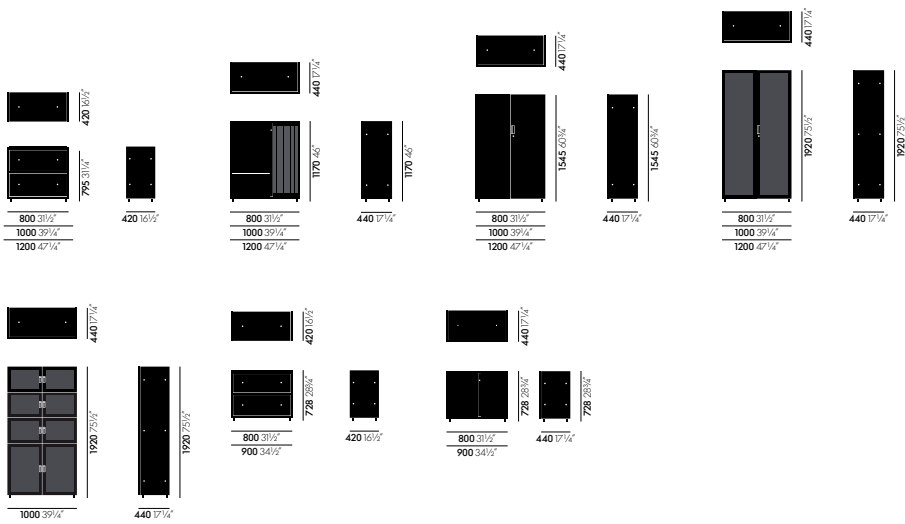

Linking: back to back

This is linked via pre-defined connection points without damaging the surface. The back-to-back linking of the Storage cupboards can be

used to create barriers between workstations so that the employees on both sides still retain access to their personal storage space.

The Vitra Configuration System (VCS) software contains comprehensive information on all Vitra products and assists you in the preparation of plans and offers. Available from your sales representative or at vcs@vitra.com.

Planning data, further information and illustrations can be found on the Vitra extranet for architects: www.vitra.com/extranet. For binding colour specifications, please order the Vitra Colour and Material Sample Box.

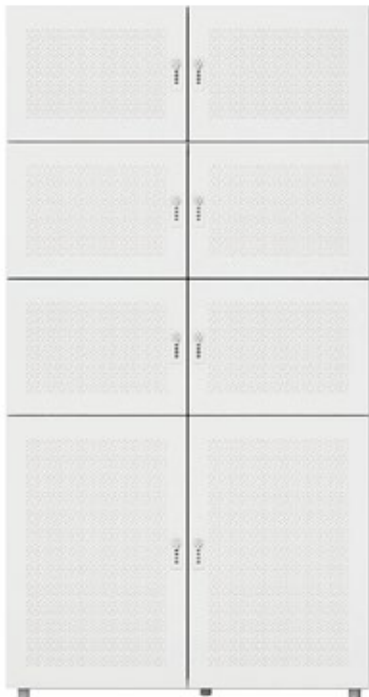

Storage Locker

Arik Levy, 2011

The Storage Locker system facilitates non-territorial workflow: Employees who do not have individually assigned desks come into the office, take their work materials out of the lockers, store their personal things there and securely lock the locker with their own PIN.

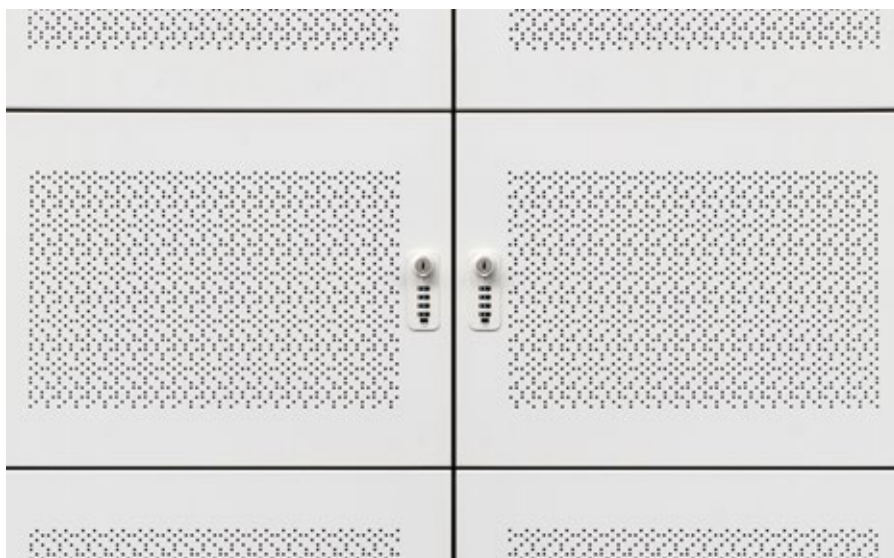

When they leave the office they repeat the entire process in the reverse order. Thus they do not have to carry as much around with them, and desks remain tidy whenever they are not in use.

Storage Locker is available in 5 HU and a width of 100 cm. The locker has a middle wall that divides it into eight compartments: six 1 HU at the top and two 2 HU at the bottom. The bottom compartments can optionally be divided with a shelf.

The front panels of the Storage Locker are available in melamine soft light or as Acoustics version with a patented perforated pattern and soundproofing in eight colours.

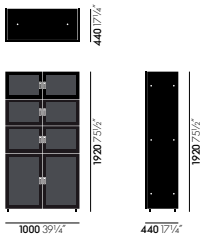

Storage Locker can be horizontally linked via pre-defined connection points to other Storage cupboards and lockers.

Locking system

The Storage compartments can be locked with a combination lock with a 4-digit PIN code that can be set and easily changed by the owner. After entry, when you open the compartment, the combination

code entered reverts to zero so that the PIN code cannot be seen by anyone. A central key and an additional code-finder (bolt), enables you to open all compartments should you forget the PIN code.
