Product Fact Sheet - Objects - Ripply Candle Holder

Ripply Candle Holder

MSDS Studio

Reminiscent of a ripple across a glassy lake, the Ripply Candle Holder reflect the environment through their curved forms. Made from mirror polished stainless steel, these soft shapes transform an industrial material into something almost ephemeral. Existing as a sculptural form, function is only revealed when placing a candle into one of the widening voids between the sheets of steel. To bounce daylight or candlelight, these unique objects create a magnetic pull.

About the designer Cristián Mohaded

The studio of Argentinian designer Cristián Mohaded focuses on objects with an innate simplicity and sensitivity. Combining natural materials with geometry and technology, he is able to design with an honesty and sensory richness. Each piece contains an individual story, while at the same time connecting together through a genuine and transparent approach to design.
