Notes

Especially after prolonged rainy or humidity periods, it is suggested to rotate the elements and/or to temporarily lift the seat/back/armrest cushions to allow complete drying and to avoid accumulation of dirt and moisture, causing the formation of mold. We recommend placing the product on terraces or verandas to guarantee its durability over the years. It is recommended to use a "Protective Cover" to improve the longevity of the product. For further information about the dedicated maintenance, please refer to the technical sheet available in the "Materials" section on our website.

For information on the compatibility of the collection's coverings with each product, please refer to the [compliance sheet](#) provided in the "Materials" section of the website.
