Museums, galleries, restaurants and similar institutions often require versatile tables that can be used in a variety of settings. Since such facilities tend to have limited storage space, a table type is needed that can be quickly and compactly stowed away and just as easily set up again. These needs are fulfilled to perfection by the Super Fold Table, making it an ideal choice for all meeting, event and food service locations where flexibility is key and furnishings are frequently rearranged in different layouts.

The Super Fold Table folds up completely with a single movement of the hand. The mechanism not only tilts the table top into a vertical position but also simultaneously rotates and aligns the legs of the four-star base so that the whole table is reduced to a single plane just a few centimeters deep. The folding mechanism is activated by pulling on a recessed grip under the table top. The grip is easy to locate, thanks to a screw that discreetly marks its position on the corresponding side of the supporting column. Once folded, the recessed grip serves as a carrying handle, making it possible to transport the Super Fold Table with one hand.

The Super Fold Table is available in both sitting and standing height.

Materials

- **Table top:** melamine faced in white with smooth straight plastic edge (19 mm), oak veneer (Europe) in natural or dark oak (19 mm) or solid core material with black edge (12 mm) in the colors white or black. Solid core table top in black with anti-fingerprint coating.
- **Folding mechanism:** die-cast zinc.
- **Column:** powder-coated steel in basic dark.
- **Base:** die-cast aluminum.
- **Outdoor applications:** version with solid core table top suitable for use in outdoor conditions on a temporary basis. Avoid prolonged exposure to rain, snow or direct sunlight. Product may be kept in covered outdoor spaces protected from the elements.
