Designed by Atelier Baptiste et Jaïna, the Ingres collection merges free random forms with an anthropomorphic character with elementary geometric shapes. Obtained by pressure on plaster volumes contained in elastic balloons, these ultra-drawn forms are nevertheless the result of a process of implementation that is both precise and completely random.

Caution

Place the angle screw hooks (not provided) in front of the two holes on the top of the back face of the mirror.

The collection also includes:

Small Ingres
mirror –
Jean

Small Ingres
mirror –
Auguste
