

ISLANDS

design Stephen Burks

Open container accessible around the entire perimeter thanks to a series of pivoting slats. Top and bottom in 19 mm thick, contoured and with bevelled MDF, with the bottom part always lacquered with epoxy powder coating matt black, and top available veneered charcoal dyed oak or Stone Oak®, with bevelled edge always lacquered with epoxy powder coating matt black, or all matt black lacquered. Top available also in Forest Green, Rosso Levanto or Sahara Noir marble (thickness 15 mm), fixed to the MDF top through screws, with a satin finish and an opaque transparent protective varnish or a matt or glossy polyester finish.

Slats, with elliptical 70x16 mm cross-section, in aluminium extrusion, fixed to the top and to the bottom by means of turned de tails in black nylon and tie rods. Slats available painted matt black, in charcoal dyed oak or Stone Oak®.

Bridge legs, with elliptical cross-section feet, made in aluminium extrusion and steel sheet screwed together and always with matt black finish. Floor support provided by contoured feet.

Notes

Wood is a living material; therefore, it can have slight color and dimension changes. The presence of any non-homogeneous color shades is not to be considered a defect but a quality. Please note that the direct sunlight exposure may alter the wood color; therefore, we recommend the periodic position shift of the objects placed on the furniture for the first months to avoid differences in shades between exposed and covered portions.

STONE OAK®: this wood owes its particular coloring to an entirely natural process. Because of this, some slabs may look more brown than others. Our commitment is to provide you a high-quality product; any differences in color should not be considered as defects.

On request, an additional protective (acrylic solvent) painting is available for the Stone Oak® finishing only. It should be noted that this additional coating slightly changes the natural color and texture of the surface. Although this supplementary painting increases the surface resistance, it is still a natural material; therefore, small superficial stains, due to oil or other substances, must be promptly removed, before being absorbed in depth by the wood. Thus, we recommend regular care and maintenance.

For the marble top version please specify the required finish in the order.

For marble finishing with opaque matt polyester finish, the "Marble" Maintenance Kit is included with the product.
