3 lighting positions table lamp.

Small, compact, fitted with 2 Led bulbs, OLO can be adapted to all types of situations and fits in anywhere.

At ease beside the bed, on the ground, on a table, in a library or on a shelf, three lighting positions allow it to be moved backwards and forwards to light horizontally, vertically and at 45 degrees and be an ideal solution to create diffused atmospheric lighting or, on the contrary, directed beam angle lighting to emphasise the most confined and specific areas.

A genuine tool with a resolutely technical design, OLO however has an affable and benevolent character. A reference at the same time to certain well-known personages in the animated film world, to military exploration objects or again to a Super 8 camera, in one dense and positive design, it focuses multiple origins in which everyone can project their own references, their own history.

At a time when the majority of so-called technical lamps are made of plastic, OLO choose to commit itself to ceramics. Using acquired techniques and ancestral know-how, it establishes its modernity in a manufacturing process and a formal and resolutely contemporary vocabulary.
