

ISLANDS LOW TABLE | INDOOR - OUTDOOR

design Stephen Burks

Set of coffee tables in three different heights and diameters, accessible from all sides thanks to a series of rotating slats, available for indoor and outdoor use.

Indoor version: top and base in 19 mm thick shaped and beveled MDF, with base always painted in matte scratch-resistant black and top available in finishes: charcoal-dyed oak or Stone Oak® veneer, with beveled edges painted matte black, or in 15 mm thick marble in Forest Green, Rosso Levanto and Sahara Noir variants, fixed to the MDF top with screws. The marble version features a satin finish and transparent matte protective coating, or a glossy/matte polyester finish. Extruded aluminum slats with elliptical section 70x16 mm, fixed to the top and base with black nylon molded parts and tension rods, available in matte scratch-resistant black finish, or veneered in charcoal-dyed oak or Stone Oak®. Alternatively, the product is available in a completely lacquered version (tops and slats) with matte scratch-resistant paint, available in black, RAL 9001 White Cream or NCS S 6000-N grey color. Extruded aluminum feet with elliptical section, screwed to the base, always painted matte black. Floor support provided by shaped feet.

Outdoor version: top and base in 20 mm thick shaped and beveled HPL, with base always painted with polyacrylic primer and lacquered with matte scratch-resistant paint in black, RAL 9001 White Cream or NCS S 6000-N grey. Extruded aluminum slats with elliptical section 70x16 mm, fixed to the top and base with black nylon molded parts and AISI 316 stainless steel tension rods, and extruded aluminum feet with elliptical section, screwed to the base, both always painted with primer and outdoor acrylic finish in matte black. Floor support provided by shaped feet.

Top in wood

Top in marble

Notes

Wood is a living material; therefore, it can have slight color and dimension changes. The presence of any non-homogeneous color shades is not to be considered a defect but a quality. Please note that the direct sunlight exposure may alter the wood color; therefore, we recommend the periodic position shift of the objects placed on the furniture for the first months to avoid differences in shades between exposed and covered portions.

STONE OAK®: this wood owes its particular coloring to an entirely natural process. Because of this, some slabs may look more brown than others. Our commitment is to provide you a high-quality product; any differences in color should not be considered as defects.

On request, an additional protective (acrylic solvent) painting is available for the Stone Oak® finishing only. It should be noted that this additional coating slightly changes the natural color and texture of the surface. Although this supplementary painting increases the surface resistance, it is still a natural material; therefore, small superficial stains, due to oil or other substances, must be promptly removed, before being absorbed in depth by the wood. Thus, we recommend regular care and maintenance.

For the OUTDOOR version, we recommend placing the product on terraces or verandas to guarantee its durability over the years. It is recommended to use a "Protective Cover" to improve the longevity of the product. For further information about the dedicated maintenance, please refer to the technical sheet available in the "Materials" section on our website.

For the marble top version please specify the required finish in the order.

For marble finishing with opaque matt polyester finish, the "Marble" Maintenance Kit is included with the product.

The scratch-resistant coating increases scratch resistance compared to standard coatings, but doesn't completely eliminate the possibility of scratches on the surface.
