

CROSS

Design: Natalino Malasorti

The taps collection, made of AISI 316L stainless steel, is available with progressive, dual handle and thermostatic mixers. Reinterpretation of the Greek cross, CROSS is characterized by the forging of the handle rigorously made on a lathe with numerical control machines. The unique and tapered body of the handle ends at the upper part into a surface that is coplanar to the one that carries it, giving linearity and cleanliness to the design. CROSS, while requiring sophisticated processing, guarantees the user a particular ergonomics.

A wide choice of remote controls and shower sets allows endless combinations with FREE IDEAS outlets: spouts, shower heads and hand showers allow you to configure and customize the product. All the products of the CROSS collection are available in satin and polished finish and in all CEA's special finishes (Black Diamond, Bronze, Copper and Light Gold) ecological and biocompatible.
