3D model available on moustache.fr

The Sphera collection of mirrors by Jean-Baptiste Fastrez is a contemporary interpretation of a technical device for creating mirror walls.

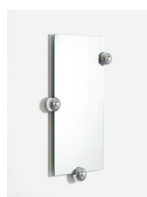

Very popular in the first half of the 20th century, the mirror bracket has since been reduced to its sole function, and today is no more than a kind of mirror attachment sold in the bathroom section of DIY shops.

A veritable system, Sphera revives the decorative tradition of this invisible technical element by giving it an unexpected sculptural dimension and unprecedented flexibility.

14 models to choose from an infinite range of possibilities.

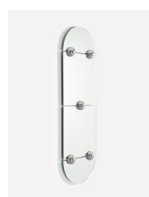

The Sphera collection also includes :

Sphera
Constellation
Mirror

Sphera Triptych
Mirror

Sphera Oblong
Large Mirror

Follow the assembly instructions carefully.

Assembly instructions available on moustache.fr on the product page.

2 dispositions are possible (horizontal and vertical). Refer to the drilling plan for the desired disposition.
