

Bramble series

Designed by Design Studio NIRUK, Germany

Bramble's beautiful and distinctive appearance was the result of an antique waffle iron that was used to create the prototype. Today, a special mould is used to replicate the process, and each vase is blown in this form, giving each vase a unique quality with a distinctive surface and bubbling structure. Bramble is also made from 100% pure sand, which ensures a stronger and higher quality than recycled glass.

Meet the designer

David and Nina are the creative minds behind the German design studio, Design Studio NIRUK. Their design philosophy is aesthetic, pragmatic and always based around user needs. They are inspired by nature, and working with authentic, pure materials and contours, shapes, tactility and new techniques are essential elements for the creative duo. Design Studio NIRUK always like to experiment and push themselves when designing new products. They think out of the box, working away from the ordinary towards the extraordinary, where they combine traditional craftsmanship with new ideas. Their designs have a clear design language, a sharp contour and are authentic products full of life, history and character.
