

Knuckle Linear Chandelier

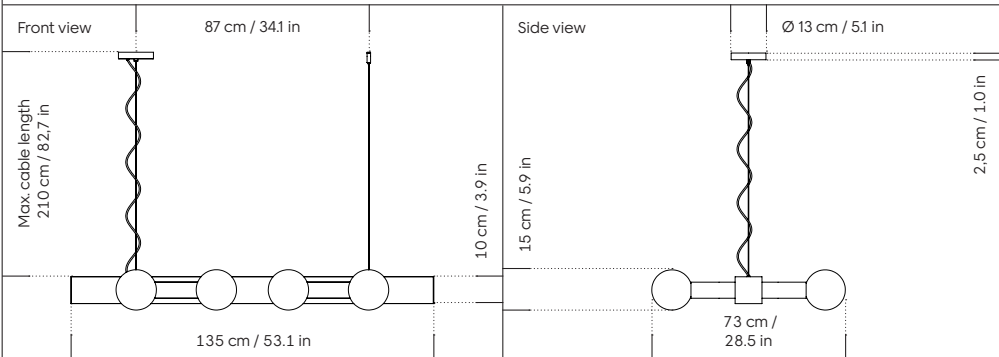

Fact Sheet

Knuckle Linear Chandelier

Design by David Taylor

The Knuckle Lights by David Taylor are an exercise in visual balance, a kind of joyful play between the organic and the geometric. Knuckle is inspired by Taylor's signature bent extruded aluminum art pieces, which are created by forcing this most stringent of materials into new shapes and forms. This method of working, translated into Knuckle, creates a sense of softness and fluidity uncommon in an industrial product. Knuckle comes in the form of a modest table light with one bulb, and as a chandelier version, resplendent with eight bulbs.

Product name	Finish	SKU
Knuckle Linear Chandelier (EU)	Brushed Aluminum	20463
Knuckle Linear Chandelier (US)	Brushed Aluminum	20464
