

DUET

Design: Mario Tessarollo / Daniela Lorato

The taps collection, made of AISI 316L stainless steel, is available with single handle, dual handle and thermostatic mixers. The circle/square dualism that characterizes DUET is emphasized by the satin finish of the circle that constitutes the tap handle, and by the polished finish of the square detail. The glossy square, set in the handle, gives the product three-dimensionality and preciousness. The refined design of DUET has been worth the ornamental model. A wide choice of remote controls and shower sets allows endless combinations with FREE IDEAS outlets: spouts, shower heads and hand showers allow you to configure and customize the product. All the products of the DUET collection are available in the standard satin finish with polished detail and in all CEA's special finishes (Black Diamond, Bronze, Copper and Light Gold) guaranteeing an ecological and biocompatible solution. These taps are completed with the DUET accessories collection.
