Glass

The lacquering used for our furniture is extremely durable as long as you avoid scratching it or bumping particularly hard/sharp objects against it. The glass is lacquered only on the back side both for mono or two-tones lacquered and frosted lacquered glasses. The shade of the samples is only indicative and has not to be taken as restrictive. It can in fact slightly differ in conformity to the tolerances recognized for the materials used. All the materials we use can be easily cleaned with water only or with a mild detergent. Do not use abrasive materials, acids or harsh chemicals. The glass is interpreted through its transparency, therefore the conformity to the sample might differ according to the surface and the thickness used. For example, the extralight glass is completely neutral when seen in the small samples, but it takes a light blue/greenish shade when used on bigger or thicker tops. For this reason, we beg you to indicate carefully those articles which have to be placed side by side or which are part of the same commission.

The two-tones finish consists of a double lacquering on the internal part of the glass sheet. The first lacquering, which is visible through the transparency of the glass, is available in the finishes of cat. B-D. The second lacquering, which is visible internally, is the same of the mat pastel used to get the finishes of cat. B. Please notice that the final effect is different from the one created by the same lacquering through the glass, in particular when it comes to soft colours.

Mirrors

Gold and rose mirrors could have small imperfections due to the particular technical characteristics of the material. We recommend not to use them in damp areas. Clean only with a dry cloth.

Ceramic

The shown samples are part of the bigger slabs Sovet works with. The complete slab is visible in the corresponding folder. Clean using water and a small amount of neutral detergent. Avoid using detergents with wax and waxing products to avoid the formation of greasy layers.

Wood

Wood colours are indicative samples. Clean using a damp soft cloth.

Metals

Metals colours are indicative samples. Clean using a damp soft cloth.

Fabrics/Leathers/Fake leathers/velvets

Fabrics colours are indicative samples. For care and maintenance please refer to the instructions present in the corresponding folders and to the technical sheets provided by the manufacturers.

In case of further doubt please get in touch with the factory.

Ceramica

I campioni riportati sono una parte delle lastre che vengono lavorate. La lastra completa si può vedere nella corrispettiva cartella. Pulire utilizzando acqua e una piccola quantità di detergente neutro. Evitare l'utilizzo di detergenti contenenti cere e prodotti ceranti per evitare la formazione di strati untuosi.

Legno

I colori dei legni sono campioni indicativi. Pulire utilizzando un panno morbido inumidito.

Metalli

I colori dei metalli sono campioni indicativi. Pulire utilizzando un panno morbido inumidito.

Tessuti/Pelli/Ecopelli/Velluti

I colori dei tessuti sono campioni indicativi. Per la cura e la manutenzione fare riferimento alle indicazioni riportate nelle rispettive cartelle e alle schede tecniche fornite dai produttori.

Se permangono dubbi contattare l'azienda.
