#### SILK-EFFECT LACQUERES / SILK-EFFECT LACQUERES GROOVE

Plein door	Groove door
✓	✓

Lacquer is a pigmented polyurethane resin applied to a MDF panel. Lacquering can have a silk-effect (matt) finish. To achieve the silk effect, a matting agent is applied directly over the lacquer.

#### STRUCTURED LACQUERS / STRUCTURED LACQUERS GROOVE

Plein door	Groove door
✓	✓

This is a soft and elegant interpretation of paint for exteriors. This coating takes on different nuances depending on the light, creating changing tones that make surfaces "vibrate". A polyurethane basecoat is applied to an MDF panel. The edges are coated twice. After having sanded the panel, a coat of coloured lacquer is applied that basically creates a slight orange-peel effect and metallic reflections that give the door surface a "rippled" look. This finish features a textured surface and metallic pigments that enhance the colour with different hues depending on how light reflects on the surface. In pale-coloured finishes like quartz, this feature is more apparent and must be considered as a distinguishing feature of the finish and not as a fault.

### FINISHES

#### METALLIC EFFECT LACQUERS / METALLIC EFFECT LACQUERS GROOVE

Plein door	Groove door
✓	✓

These finishes reproduce the effect of metals. A dark basecoat is applied to an unfinished MDF panel after which the skilled hands of lacquerers apply the metallic lacquer so as to create subtle, soft, light and dark differences in shade that produce a sort of 3D effect.

#### WOOD VENEERS / WOOD VENEERS GROOVE

Plein door	Groove door
<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

A sheet of precious wood veneer is applied to a wood particleboard panel to give the finish a natural look and feel. This type of finish reduces the environmental impact created by felling trees because it replaces solid wood while preserving the same aesthetics. Moreover, it produces a lighter and more stable product. A finishing cycle of acrylic varnish preserves its features during day-to-day use.

#### OAK (ROVERE)

Is derived from trees belonging to the fagaceae family and is available in a palette of light, medium and dark colours to create timeless settings. First finishes are not available with a continuous grain match.
